1. PRODUCT IDENTIFICATION

Product Name: Zinc Phosphide 82 Technical
Signal Word: CAUTION
Active Ingredient (%): Zinc Phosphide (82.0%)  
Chemical Name: trizinc diphosphide
Chemical Class: An inorganic compound.
Registration Number: 25204

Section(s) Revised: Annual Review

2. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients not precisely identified are proprietary or non-hazardous. Values are not product specifications.

3. HAZARDS IDENTIFICATION

Symptoms of Acute Exposure
Irritating to the eyes and skin. Prolonged exposure to zinc phosphide fumes may cause eye irritation and conjunctivitis, i.e. redness, discharge and/or swelling in eyes. Exposure may cause nausea, vomiting, abdominal cramps, chills, headache, restlessness, excitement, agitation, and dizziness. Tightness in the chest, breathing difficulty, cough, and cyanosis indicate the development of pulmonary edema. Other effect may include diarrhea, low blood pressure, change in skin color, garlic breath odor, fever, shock, tremors, fatigue, excessive perspiration, hypertension, dysrhythmia, metabolic acidosis, convulsion, and coma. Other complications may involve jaundice and liver tenderness and enlargement from liver necrosis and anuria from renal tubular injury. DEATH IS DUE TO SEVERE POISONING.

Hazardous Decomposition Products
May react with acids or water to release toxic and spontaneously flammable phosphine gas. Oxides of phosphorus and zinc.

Physical Properties
Appearance: Dark grey crystals, lustrous or dull powder
Odor: Pungent garlic odor

Unusual Fire, Explosion, and Reactivity Hazards
Dangerous when wet. Dangerous fire hazard and slight explosion hazard when exposed to water. Dust mixtures may ignite and/or explode. When heated to decomposition, it emits toxic fumes of phosphorus and zinc oxides (Sax 1984, Pg. 2756). Irritating oxides of phosphorus may be formed in fires (Chris, 1978). Contact with water produces flammable gas. Runoff may create fire or explosion hazard (DOT ERG 2000, Guide 139).
4. FIRST AID MEASURES

Have the product container, label, or Material Safety Data Sheet with you when calling a poison control center or doctor, or going for treatment. **FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL 1-800-498-5743.**

**Ingestion:**
CALL PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY! DO NOT DRINK WATER! Do not administer anything by mouth or make the patient vomit unless advised to do so by a physician.

**Eye Contact:**
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**Skin Contact:**
If on skin or clothing: Take off contaminated clothing. Wash skin with soap and water.

**Inhalation:**
If exposed, immediately seek fresh air, assist respiration as needed and watch for signs of poisoning. If person is not breathing call an ambulance and give artificial respiration, preferably mouth-to-mouth, if possible.

**Notes to Physician**
There is no specific antidote. Very thorough gastric lavage usually indicated. 3-5% sodium bicarbonate gavage has been suggested. Treat supportively and symptomatically.

Irritating to the eyes and skin. Prolonged exposure to zinc phosphide fumes may cause eye irritation and conjunctivitis, i.e. redness, discharge and/or swelling in eyes. Exposure may cause nausea, vomiting, abdominal cramps, chills, headache, restlessness, excitement, agitation, and dizziness. Tightness in the chest, breathing difficulty, cough, and cyanosis indicate the development of pulmonary edema. Other effect may include diarrhea, low blood pressure, change in skin color, garlic breath odor, fever, shock, tremors, fatigue, excessive perspiration, hypertension, dysrhythmia, metabolic acidosis, convulsion, and coma. Other complications may involve jaundice and liver tenderness and enlargement from liver necrosis and anuria from renal tubular injury. DEATH IS DUE TO SEVERE POISONING.

**Medical Condition Likely to be Aggravated by Exposure**
None known.

5. FIRE FIGHTING MEASURES

**Fire and Explosion**

**Hazardous Decomposition Products:**
May react with acids or water to release toxic and spontaneously flammable phosphine gas. Oxides of phosphorus and zinc.

**Unusual Fire, Explosion, and Reactivity Hazards**
Dangerous when wet. Dangerous fire hazard and slight explosion hazard when exposed to water. Dust mixtures may ignite and/or explode. When heated to decomposition, it emits toxic fumes of phosphorus and zinc oxides (Sax 1984, Pg. 2756). Irritating oxides of phosphorus may be formed in fires (Chris, 1978). Contact with water produces flammable gas. Runoff may create fire or explosion hazard (DOT ERG 2000, Guide 139).

**In Case of Fire**
Potentially hazardous in fire. Wear self-contained breathing apparatus. If water is used as an extinguishing media, diking is required to keep contaminate water out of all water supplies.
6. ACCIDENTAL RELEASE MEASURES

In Case of Spill or Leak
Avoid bodily contact. Avoid dust. Wear protective equipment. Keep put of bodies of water and sewer. Shut off ignition sources. Do not get water on spilled material or inside container. For a small spill, carefully shovel/sweep up/vacuum and package material in clean, covered, and dry labeled containers. For larger spills, dike spill for later disposal. Cover powder spills with plastic sheet or tarp to minimize spreading. Clean up only under supervision of an expert. Keep unnecessary people away. Isolate hazard area and deny entry.

7. HANDLING AND STORAGE

Store the material in a well-ventilated, secure area out of reach of children and domestic animals. Do not store food, beverages or tobacco products in the storage area. Prevent eating, drinking, tobacco use, and cosmetic application in areas where there is a potential for exposure to the material. Wash thoroughly with soap and water after handling.

8. EXPOSURE CONTROLS/PERSOANAL PROTECTION

THE FOLLOWING RECOMMENDATIONS FOR EXPOSURE CONTROLS/PERSONAL PROTECTION ARE INTENDED FOR THE MANUFACTURE, FORMULATION, PACKAGING, AND USE OF THIS PRODUCT.
FOR COMMERCIAL APPLICATIONS AND/OR ON-FARM APPLICATIONS CONSULT THE PRODUCT LABEL.

Ingestion: Prevent eating, drinking, tobacco usage and cosmetic application in areas where there is a potential for exposure to the material. Wash thoroughly with soap and water after handling.

Eye Contact: Wear tight-fitting chemical goggles or safety glasses with fitted side-shields.

Skin Contact: Wear chemical resistant (such as nitrile or butyl) gloves.

Inhalation: Respiratory protection is required for normal handling. In the event of exposure, use engineering controls or a NIOSH-approved particulate respirator (N, P, R, or HE filter) to keep exposure below the Occupational Exposure Limit.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Dark grey crystals, lustrous or dull powder
Odor: Pungent garlic odor.
Melting Point: 420º C
Boiling Point: Not Available
Specific Gravity/Density: 4.55 @ 13º C
pH: Not Available
Solubility: Insoluble in Water
Vapor Pressure (mm Hg): 1.03 x 10⁻⁸ @ 77º F
Vapor Density: 1.17 (Phosphine)

10. STABILITY AND REACTIVITY

Stability: Stable under normal use and storage conditions.
Hazardous Polymerization: Will not occur.
Conditions to Avoid: None known.
Materials to Avoid: None known.
Hazardous Decomposition Products: May react with acids or water to release toxic and spontaneously flammable phosphine gas. Oxides of phosphorus and zinc.

**Other Toxicity Information**

Irritating to the eyes and skin. Prolonged exposure to zinc phosphide fumes may cause eye irritation and conjunctivitis, i.e. redness, discharge and/or swelling in eyes. Exposure may cause nausea, vomiting, abdominal cramps, chills, headache, restlessness, excitement, agitation, and dizziness. Tightness in the chest, breathing difficulty, cough, and cyanosis indicate the development of pulmonary edema. Other effect may include diarrhea, low blood pressure, change in skin color, garlic breath odor, fever, shock, tremors, fatigue, excessive perspiration, hypertension, dysrhythmia, metabolic acidosis, convulsion, and coma. Other complications may involve jaundice and liver tenderness and enlargement from liver necrosis and anuria from renal tubular injury. **DEATH IS DUE TO SEVERE POISONING.**

12. **ECOLOGICAL INFORMATION**

Do not discharge effluent containing this product directly to water. Do not contaminate water when disposing of equipment wash water.

13. **DISPOSAL CONSIDERATIONS**

**Container Disposal**

*Plastic Containers*: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

*For containers 1 gallon or less*: Do not reuse empty container (bottle, can, bucket). Wrap container and put in trash.

**Pesticide Disposal**

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

IATA Classification
- Proper Shipping Name: RQ, Zinc Phosphide, 4.3, DANGEROUS WHEN WET, POISON, ERG Guide 139
- Hazard Class: Not Applicable
- UN Number: 1714
- Packing Group: I
- Label: DANGEROUS WHEN WET, POISON
- Special Instructions: PLACARD ALL QUANTITIES.

Canadian Classification
- Proper Shipping Name: RQ, Zinc Phosphide, 4.3, DANGEROUS WHEN WET, POISON, ERG Guide 139
- Hazard Class: Not Applicable
- UN Number: 1714
- Packing Group: I
- Label: DANGEROUS WHEN WET, POISON
- Special Instructions: PLACARD ALL QUANTITIES.

15. REGULATORY INFORMATION

EPA SARA Title III Hazard Classification (For Reporting Under Sections 311 & 312)
- Immediate: Y
- Fire: N
- Sudden Release of Pressure: N
- Delayed: N
- Reactive: Y

Section 313 Toxic Chemicals
- Zinc Phosphide (CAS No. 1314-84-7) 82%

California Proposition 65
- Not Applicable

CERLA/SARA 302 Reportable Quantity (RQ)
- Zinc Phosphide (CAS No. 1314-84-7) 82% Reportable Quantity: 100 lbs.

RCRA Hazardous Waste Classification (40 CFR 261)
- P122 (For concentrations of greater than 10%)

TSCA Status
- Exempt from TSCA, subject to FIFRA
